The Royal Jennerian Society for the Extermination of the Small Pox.

There are five bound volumes registering the transactions of this Society from its initiation in London in 1803 to its dissolution in 1809; previous to which date Dr. Jenner had withdrawn from it.

- 1.—*The Minutes of the Royal Jennerian Society, for the Extermination of the Small Pox.* These commence January 19th, 1803, when the first meeting was held to consider the best means to be adopted for the Extermination of the Small Pox, at which an address to the public was read and presented to Chas. Price, the Lord Mayor, in the chair.

These minutes of Quarterly Courts and Special General Courts are continued to December 3rd, 1806. The meetings were held at the London Tavern. In this volume the Laws and Regulations of the Society are set forth, also the names of the President, The Duke of Beaufort; Vice-Presidents, The Archbishop of Canterbury; John Moore, The Duke of Devonshire; and many other people of the highest distinction and a list of Lady Patronesses.

ON A LATE DEFEAT AT GLOUCESTER.

How strange the reverses we're doomed to behold;
Why, who can believe what I say, when he's told
That a gallant Commander who'd die soon as yield
The fight to a Foe on old Neptune's green field,
On our shores has excited our grumbling and wonder,
For now to a Cooper for sooth he knocks under.

Draft Letter from Dr. Ed. Jenner to Marie, Dowager Empress of Russia.

"A Cheltenham ce November 1802. Madame,—Les paroles me manquent pour exprimer tout ce qui je ressens de reconnaissance envers Votre Majesté Imperiale, pour avoir daigné m'adresser une très gracieuse lettre, accompagnée d'une bagin de grand prix ; mais infiniment plus precieuse pour etre le dou d'une Princesse, encore plus distinguée par ses vertus que par son haut rang dans les empires. Ce present pour moi inappreciable, sera confié apres ma mort à mes descendans, avec une legende qui marquera le source illustre d'où il m'est parvenu.

"Il m'est assurément très flatté que la decouverte que j'ai eu le bonheur d'annoncer au public, ait attiré l'attention de Votre Majesté Imperiale ; et qu'elle ait bien voulu en étendre l'usage aux établissemens pieux sous sa protection. Une telle exemple contribuera de la maniere la plus efficace, à eteindre les prejngés et à hâter l'adoption universelle de la Vaccine. De cette maniere l'aneantissement d'une maladie, la plus funeste peutetre dont le genre humain ait jamais été affligée sera accéléré et des milliers de victimes échapperont d'une mort prématurée.

"Permettez Madame que je saisisse cette occasion pour offrir à Votre Majesté, avec mon hommage respectueux quelques Esquisses que j'ai écrites sur ce sujet important. Puissé-je vous les offrir pendant longues. Années desdites réflexions, qui sont le privilege précieux des âmes sensibles et bien faisantes. De telles réflexions n'émanent que des cœurs formés comme le sien pour soulager les maux de la nature humaine."
